SAP Data Center "Cloud" Assessment

UNDERSTANDING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

SAP Data Center "Cloud" Assessment gives customer a clear view of SAP Application Landscape consolidation opportunities within the existing data center or a planned data center for new SAP implementations. WFT will assess the current SAP landscape or review the planned landscape to determine clients potential costs and savings and better prepare you to roll out SAP on cloud based infrastructure.

Wherever you stand and wherever we start, Wharfedale Technologies (WFT Cloud) Services can guide you to an end state that is right for your Business. WFT Cloud can manage the complexity of transformation and the evolution of virtualization extending the customer to the SAP Cloud Computing Roadmap. WFT's IT experience is exceptional; our industry knowledge, profound.

ASSESSMENT+DESIGN

Assess the current SAP landscape / review the planned landscape to determine potential costs savings and design a optimal landscape for new SAP implementations or improve existing landscapes for Virtualization and Cloud. .
