SAP HANA (In-Memory on Cloud) Services

"Accelerate business performance with HANA Database"

SAP HANA ON CLOUD

SAP is addressing the increasing need for in-memory computing with SAP HANA appliance software that enables business users to instantaneously access, explore, model and analyze data in real time, without impacting existing applications or systems.

Most enterprises lack the analytics capability required to pull information from across the organization and turn that data into action. In such a scenario, HANA in-memory computing can provide the speed and agility to power analytics at unprecedented performance levels while remaining cost effective.

Companies need the right partner to help them assess their current capabilities and develop a strategy to address the challenge.

WFTCloud can be your partner - helping you clearly analyze the required costs & efforts, and benefits that can be derived by modernizing your IT landscape with SAP HANA on Cloud with subscription model pricing. You can determine the next steps for transforming your business environment with our preparatory and deployment services; efficiently executing a smooth transition to the in-memory solution.

Highlights of HANA

Real Time decision making	TCO Reduction	Next Generation Technologies

Service Offerings

Deployment Services with HANA

- Creation of SAP HANA roadmap
- Decision on adoption SAP HANA
- SAP Business suite powered by HANA
- BW powered by HANA
- Deployment of Pre-configured RDS applications and accelerators
- Business specific solutions formulations and deployment
- Technical feasibility check and upgrade to implement SAP HANA
- Business scenarios simulation for decision making

SAP Innovation across Industry Verticals

Health Care	Transportation	Utilities	Wholesale Distribution
• Best cost effective quality care with access to the right information • Co-ordination and collaboration of care by sharing data securely	• Optimized operations performance and increased profitability • Predict cash flows to manage collection, risk and short term borrowing in real time	• Instant access to qualitative info across multiple data sources • Greater visibility into grid operations optimizing capital planning	• Precise and actionable insight from real time profitability analysis • Operational data captured across line of business

Assessment Services

Feasibility Study

- Explore possibilities to introduce SAP HANA and integrate into your environment

Strategy Planning

- Design business scenarios and reporting requirements to build future roadmap and strategy

Preparatory Services

Infrastructure Readiness

- Planning and executing upgrades / Patches / Enhancement Packs

Proof of Concept (POC)

- Assessing need for PoC on SAP HANA with WFTCloud
- Executing PoC on WFTCloud with SAP HANA

Deployment Services

Accelerators / Rapid Deployment Solutions (RDS)

SAP Qualified Partner-Led Rapid Deployment solutions

- Profitability Analysis - provides on-the-fly analysis of Sales Revenue and Contribution Margin
  - ✦ Intelligent allocation of cost right up to customer invoice level
  - ✦ Rerun and versioning of all allocations
  - ✦ Real-time margin calculation
  - ✦ Powerful insights with decision supporting reporting system

- Sales Information Cockpit
  - ✦ Tracking order and delivery status
  - ✦ Unconfirmed order analysis
  - ✦ Aging analysis for order, delivery & Invoices
  - ✦ Tracking product stock availability

Partner-Led Rapid Deployment Solutions

- Revenue and Profit-based Back Order Re-scheduling Powered by SAP HANA on WFTCloud
  - ✦ Advanced algorithm for inventory allocation based on financial parameters like net value and gross margin
  - ✦ Intelligent logic based on donor-receiver principle to process limited orders which needs re-scheduling
  - ✦ Improved algorithms for fetching the sales orders for BOR as per selection criteria, resulting in drastic decrease in fetch time
  - ✦ Capability to handle multiple BOR runs in parallel

Business Warehouse (BW) powered by HANA

- BW powered by HANA OSDB migration
- BW powered by HANA implementation & Maintenance services

SAP Business Suite powered by HANA

- SAP Business Suite powered by HANA OSDB migration
- SAP Business Suite powered by HANA implementation & Maintenance services
